Hammered /W

Wall Lamp Ref. 50031

Contemporary style wall sconce made entirely of brass.

Hammered's tubes are mounted at different heights following a curved line.

This distinct design is created by hammering individual brass tubes by hand, in our workshop in Valencia.

The random hand finished nature of this creation means that each tube (and light) are unique to the craftsman creating it.

Finished in satin brass, the hammered tubes appearance is lifted still further once the hand polishing process has been completed.

This item is available in customised form on request.
