lava

lava

Elegant and modern LAVA includes two versions of luminaires— surface-mounted and flush with the ceiling. The surface-mounted version is enclosed in a shallow, geometric luminaire which, thanks to its low height (only 67 mm), blends in well with the ceiling without dominating the interior. The recessed ceiling version is mounted on a rectangular or square plate which covers the mounting holes. The simple body houses hinged reflectors, thanks to which we can direct the light stream also to the sides. Lava has a very wide range of applications— from living spaces to offices and hotels.
