# shift

A versatile family of spotlights as well as spot and downlight type luminaires. The SHIFT collection includes surface-mounted spotlights, wall lamps, recessed ceiling luminaires and lamps mounted to Track 1F/3F using adapters. The family is characterised by round, recessed optics integrated into the rectangular shape of the housing. Additionally, version 12.1 features optics that include an anti-glare screen and retracted diodes designed to reduce glare as much as possible (UGR<19). Shift luminaires offer a variety of model sizes – from a mini wall lamp ideal for bedrooms to 12LED spotlights

and recessed luminaires which can be used as the main lighting. In addition, the system includes a Shift Adaptor 1F/3F in various versions designed to be mounted on a three-phase rail, which enables a broad range of spotlight movement and lighting flexibility. The Shift family will work well as the main, supplementary or zone lighting. It is a great choice for any location that requires a simple luminaire and a robust light source – version 1.4 of the Shift luminaire provides as much as 700lm of light and even a DALI control module – all this in a luminaire that is just 30mm wide.
